

SNOW BLADE WITH WINGS

The **UFO snow blade** is equipped with individually controlled side wings that make the attachment suitable for many applications. Particularly suited to industrial premises, large areas, airports etc.

The main blade has individually sprung cutters, while the side wings are fitted with UFO's in-house developed side wings that allow spring-loaded vertical wear bar movement. This allows the snow blade to be tilted further forward while maintaining even wear on the wing wear bars.

The snow blade is available in sizes from 4.2 m to 5.4 m.

Art no	Article	Total width [mm]	Wing width [mm]	Height [mm]	Weight c. [kg]
48420090	Snow blade with wings	4200	900	1100	1825
48480120	Snow blade with wings	4800	1200	1100	1965
48540120	Snow blade with wings	5400	1200	1100	2170
